About Me

Dynamic Mern Stack Developer, delivering impactful full-stack solutions. Skilled in React.js and Node.js, I excel in crafting robust REST APIs and managing databases. Adept at collaboration and problem-solving, I successfully deployed a comprehensive attendance management system, showcasing my commitment to excellence.

SKILLS

- Frontend: React.js, JavaScript (ES6+), State Management (Redux, Context API), HTML5, CSS3
- Backend: Node.js, Express.js, MySQL, REST APIs, JWT Authentication, OAuth
- Tools and Platforms: Git, GitHub, Postman, Firebase
- Other: full-stack development, database design, WordPress, WooCommerce

EXPERIENCE

MERN STACK DEVELOPER

Student | Islamabad , Pakistan

- Engineered full-stack attendance and stipend management system for Pakistan Bait Ul Mal with role-based authentication and admin panel functionality.
- Developed REST API for Natours utilizing Node.js, Express, and MongoDB within comprehensive bootcamp project.
- Constructed practice project with WordPress and WooCommerce to enhance familiarity with eCommerce solutions.
- Successfully deployed attendance-stipend management system at attendance-stipend.vercel.app.
- Completed REST API project for Natours, ensuring functionality.
- Utilized MySQL, Express.js, React, and Node.js in attendance management system development.
- Leveraged WordPress and WooCommerce for creating a fully deployed eCommerce practice project.
- Maintained GitHub repositories for all projects to showcase development work.
